

PRESS RELEASE

Brussels – 20 January 2023

THE HIGH-LEVEL FORUM ON EUROPEAN STANDARDIZATION: AN OPPORTUNITY TO STRENGTHEN THE SINGLE MARKET

On Friday, 20 January, the Presidents of CEN and CENELEC participated in the inaugural meeting of the High-Level Forum on European Standardization. The event was an opportunity to initiate a collective reflection on future standardization priorities in support of European policies and the Single Market.

The meeting, hosted by Thierry Breton, European Commissioner for the Internal Market, brought together 50 high-level representatives from industry, policy, civil society, and standardization. CEN and CENELEC were represented, respectively, by CEN President, Stefano Calzolari, and CENELEC President, Wolfgang Niedziella.

The [High-Level Forum on European Standardization](#) is designed to provide advice to the Commission in anticipating upcoming standardization priorities and contribute to the EU's role as a global standard-setter. It seeks to bring together the variety of expertise that the European Union has in developing standards and raise the profile of standardization issues to a wider audience.

The Forum has been introduced as part of the new [European Standardization Strategy](#) introduced in February 2022 by the European Commission. The Strategy recognises the vital role that standardization plays in facilitating the European Single Market, fostering innovation, and enhancing Europe's role in global trade.

As two of the officially recognised European Standardization Organizations (ESOs), CEN and CENELEC support the Strategy and are ready to work with all stakeholders, Member States, and the Commission in the consolidation of European expertise in standardization and in the definition of its future, to the benefit of the EU.

In participating to the High-Level Forum, **Stefano Calzolari, President of CEN**, said: "Standards have always been an important element for Europe, as the success of the Single Market, which this year is celebrating its 30 years anniversary, testifies. Now, we must look at the next 30 years, focusing especially on the most innovative projects to ensure Europe's strength and the well-being of citizens. We need standards that are developed at the right time, at the right level, with the right speed. On this, this High-Level Forum provides an opportunity to work together and build the future of standardization".

Wolfgang Niedziella, President of CENELEC, commented: "In the current global environment, a resilient Single Market supported by a robust European Standardization System is key. The High-Level Forum will be crucial to help us identify standardization priorities to deliver on the twin digital and green transitions and a competitive Single Market. We can help Europe play a strategic role at the global level, leveraging our relations with ISO and IEC, the international standardization organizations".

CEN and CENELEC

CEN (European Committee for Standardization) and CENELEC (European Committee for Electrotechnical Standardization) are recognized by the European Union (EU) and the European Free Trade Association (EFTA) as European Standardization Organizations responsible for developing standards at European level.

The members of CEN and CENELEC are the National Standardization Bodies and National Electrotechnical Committees of 34 European countries. European Standards (ENs) and other standardization deliverables adopted by CEN and CENELEC, are accepted and recognized in all of these countries. European Standards (ENs) contribute to enhancing safety, improving quality, facilitating cross-border trade and strengthening the European Single Market. CEN and CENELEC work to promote the international alignment of standards in the framework of technical cooperation agreements with ISO (International Organization for Standardization) and the IEC (International Electrotechnical Commission).
